YOUR NEEDS.

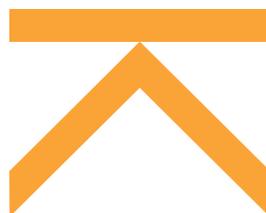

# OWNERSHIP

The Chairman of our holding company, and of absolute FZC and Kudos G.E LLC in Dubai is Sultan Al Habtoor, one of the most well respected businessmen in the UAE. Sultan identifies with great brands through his business association with McLaren, Bugatti and Bentley!

# COMPANY

## »» WHO WE ARE

Making the most of outdoor spaces as a leading brand of outdoor furniture for the hospitality market, with an established reputation as the first choice for five star hotels and resorts in all outdoor areas.

Kudos has provided a wide range of outdoor furniture, catering specifically to the requirements of the hospitality industry, for over 25 years in the UAE and GCC. We have learned to provide comfort, customisation and convenience for our clients, we manufacture standard product collections, as well as customised designs.

Kudos selects raw materials carefully to reach the quality standards of its customers who are predominantly five star hotels and resorts. It's high quality is repeatedly proven through good performance in coastal areas and locations that experience high UV.

# FACTORY

## » MANUFACTURING

Kudos Operations include Design and Build, package, Supply and installation.

Our furniture combines four elements: function, reliability, safety and aesthetic enhancing appeal.

Through our international manufacturing partners, Kudos is able to oversee the design and production of its outdoor furniture. This ensures the quality standards do not slip, giving you the peace of mind of a quality product, professionally crafted and ready-to-use.

In addition Kudos has a fibreglass manufacturing plant in the UAE which allows us to maximize the production work in factory-controlled conditions, so the highest possible quality is assured.

We aim for th furniture user to have years of trouble-free enjoyment from a range of elegant yet functional furniture which reflects technical innovation and makes a statement about the users choice of quality and style .

# WHY KUDOS?

## »» SERVICE

Kudos is specialised in providing a large range of outdoor furniture from bespoke design through to the finished product, Kudos produces it all.

Kudos aims to provide a full package service from designs to manufacturing, transportation and installation.

Kudos service does not end once we deliver the furniture. Kudos provides a Care and Maintenance service on all products sold. Our general scope of works include:

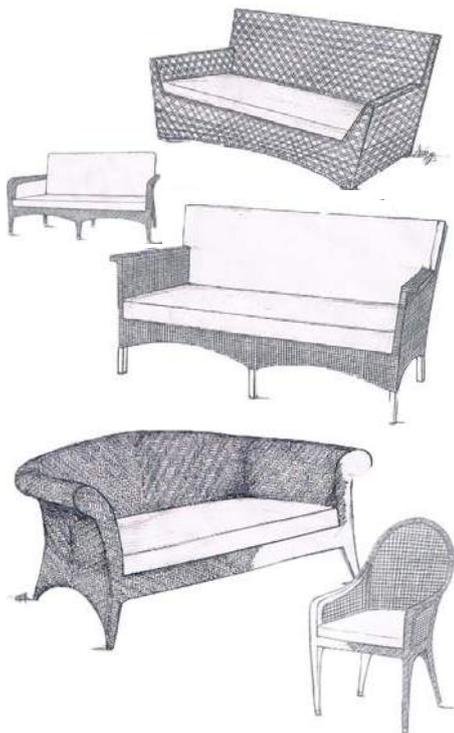

- General cleaning of all products
- Umbrella repair & Maintenance
- Sanding & re-oiling of all teak products
- Re-weaving any loose end of Wicker Weave
- Replacement of worn foot protectors
- Re-spraying of chipped and damaged finishes

## »» QUALITY

With a large range of outdoor products, Kudos places a high priority on material selection. Materials include Teak, Injected Rattan, Aluminium, Stainless Steel, GRP and All Weather Wicker. A combination of the best raw materials and expert craftsmanship create visually stunning outdoor furniture.

Most of our furniture collections are erected from powder-coated aluminium frames, which are in then hand woven with Kudos Bold Weave into our wide range of elegant outdoor furniture.

Our weave is made from ISO certified Polyethylene. We extrude our own fibre which is then certified by SGS, the worlds leading inspection, verification, testing and certification company based in Hong Kong.

# Materials & Fabrics

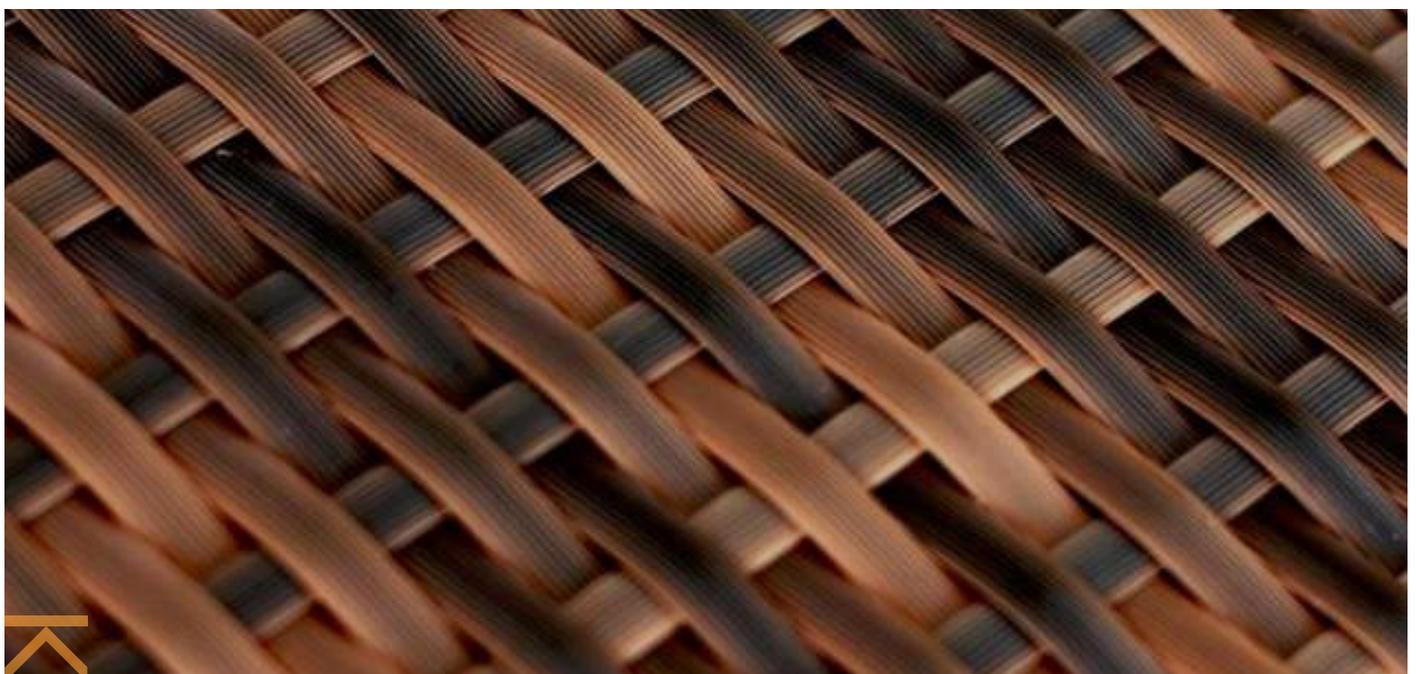

# ALL WEATHER WICKER

All Weather Wicker furniture is hand woven High Density Polyethylene (HDPE) with premium synthetic ISO certified polyethylene fibers such as Viro®, Rehau®, Ecolene®, and Bold Fiber® which are certified by SGS, highly flexible, contain UV resistants, heat protecting agents and impact hardeners, thus making it an ideal product for the outdoor use in any environment.

These fibers are designed to be insensitive to temperature differences ranging between -25C +60C. When temperatures are below 0C, the weave will become somewhat stiffer than usual and in extremely hot temperatures the weave will become more elastic. However, the furniture will retain its normal elasticity once the temperature stabilizes.

AWW is 100% recyclable and are resistant to chlorine and salt water. Kudos Global's AWW furniture with this type of material can be left outside all year round and is able to withstand virtually any outdoor environment. It is washable, recyclable, non-toxic and environmentally-friendly.

## »» BOLD WEAVE

The weave used by Kudos is a High Density Polyethylene (HDPE). This material has a high resistance to UV rays and other atmospheric agents (CIBA). This material includes impact modifier for additional strength. It is washable, recyclable, non-toxic and environmentally friendly.

This weave is produced by Kudos in house and has undergone vigorous testing by SGS, in respect of resistance to UV, humidity, colour fastness, extremes of temperature, braking force and elongation. The result has been qualified as excellent.

# INJECTED RATTAN

## »» POLYETHYLENE

The Injected rattan collection is unique in that it is made from injection mouldered polyethylene.

Polyethylene is reliable, it withstands tropical temperatures as easily as it does the freezing cold. this sturdy material can easily take a knock. Nevertheless, it is remarkably light and can be used in many applications for outdoor furniture.

Polyethylene is extremely suitable for re-use. it is a thermoplastic material, which means that it can be melted down and used for making products virtually indefinitely.

The design for manufacture is very clever as melted polyethylene is pressed into a cooled mould. the Contents set, the mould opens and an all-ready product is ejected.

White

# TEAK WOOD

Teak wood is a unique type of wood that, if left in its natural state, is virtually maintenance-free. It can be left outside year round, surviving even the most extreme weather conditions. Therefore, teak is often considered to be the golden standard of outdoor furniture. However, over time as natural teak is exposed to various elements, it gradually changes color from the it's golden honey of new teak to a silver-gray patina which distinguishes finely aged, outdoor teak.

Being a tropical hardwood, Kudos preserves it's gold standard furniture by having the hardwood stained with natural teak oil which is often recommended to preserve the natural honey colour or to darken the colour of the wood. Teak sealer contains UV protection to keep the sun from graying the furniture as well as a fungicide to prevent the growth of mold and mildew on the surface.

# STAINLESS STEEL

Stainless Steel, also known as inox steel or inox from French "inoxydable", is a steel alloy with a minimum of 10.5% chromium content which does not readily corrode, rust or stain with water as ordinary steel does. This allows for excellent corrosion resistance to Kudos Global's stainless steel furniture which is essential for outdoor environments and extreme weather conditions.

Simultaneously, stainless steel is a constructional material. It's mechanical properties such as blocking oxygen diffusion to the steel surface, and blocking corrosion from spreading into the metal's internal structure makes stainless steel an exceptional element in functional and long lasting outdoor furniture.

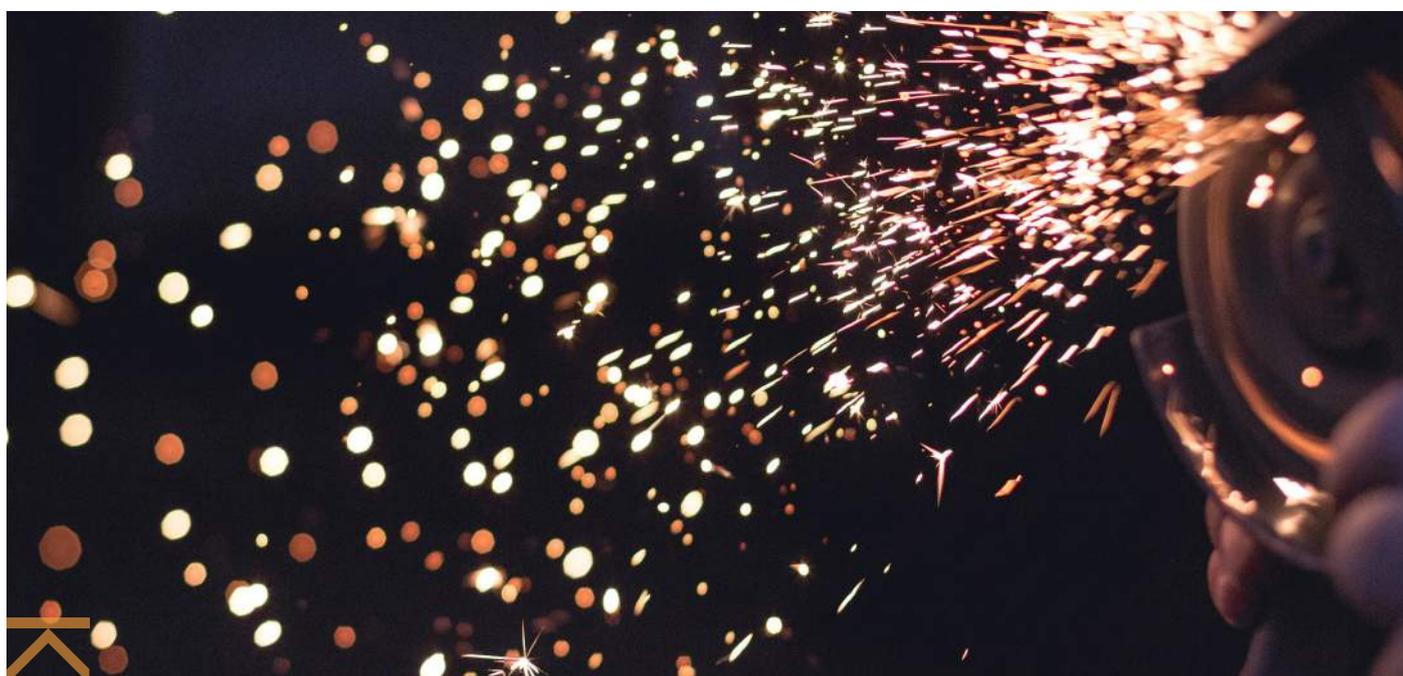

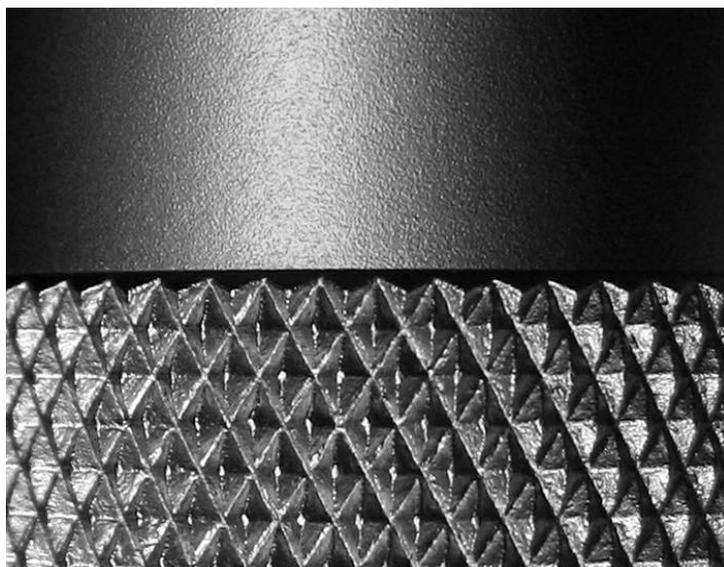

# ALUMINIUM

Aluminium is a light and tough metal with an excellent strength to weight ratio and corrosion resistance - making it an ideal material for outdoor furniture as it is very durable, does not rust, requires little maintenance and has the ability to take on any shape or style required.

The aluminium tubing standard is 1.6 to 1.9mm and the corrosion resistance of Kudos Global's aluminium furniture is enhanced by pre-treating the aluminium extrusions with a chrome conversion coating that deposits a thin layer of chrome on the surface.

The treated frame is subsequently coated with an electro-statically applied, powder coat finish. The electro-static application method ensures 100% coverage of the metal's surface area and provides a consistent and tough finish that far exceeds other conventional paint finishes. The resulting finish is knock and scratch resistant, impervious to moisture, highly resistant to corrosion and easy to clean.

# GLASS REINFORCED PLASTIC

## »» GRP

Design freedom and the easiness to work fibreglass makes it an excellent alternative for the manufacture of any furniture product as there are few constraints on size, shape, colour finish, the styling and appearance can take precedence over manufacturing costs.

In highly corrosive environments GRP is the preferred choice over metal, wood, or plastic. A popular choice where exposure to harsh environments is a concern, GRP provides resistance to ultra violet light, extreme temperatures, salt air and a variety of chemicals including most acids.

## »» GELCOAT

A gelcoat forms the smooth outer surface of the finished product.

Gelcoats are a critical part of most GRP laminates as they enhance both the performance and the appearance of the finished composite. A flat, semi-gloss or high-gloss colour can be achieved eliminating the need for painting. Kudos ensures good workshop practices and great care is taken to ensure that mould surfaces are properly prepared before gelcoating, for a smooth and clean finish.

# FABRICS

## »» SUNPROOF® FABRIC

Kudos use Sunproof® fabrics that are a premium quality of outdoor fabric which provide the exclusive solution for your comfort. It is produced with a series of technical data proving the high performance of the fabric against natural weathering such as water and mildew.

The trademark is established as specially designed to perfectly dress the outdoor furniture with spicy and tropical outdoor fabrics. After years of research and development Sunproof® Outdoor Fabrics have been thoroughly UV, temperature, fire tested and proven internationally for its reliability, strong colour fastness and safety. The foam core of Kudos Global's cushions are made from a water resistant and breathable polypropylene based material. The swelling seams prevent water from penetrating the foam core.

They fabric can be easy washed and will even hold up tough cleaning chemicals such as bleach. This allows for fast solutions to spillages, and basic stains. As a proof of our commitment to the environment, all our manufacturing facilities have been certified for their environmentally friendly quality.

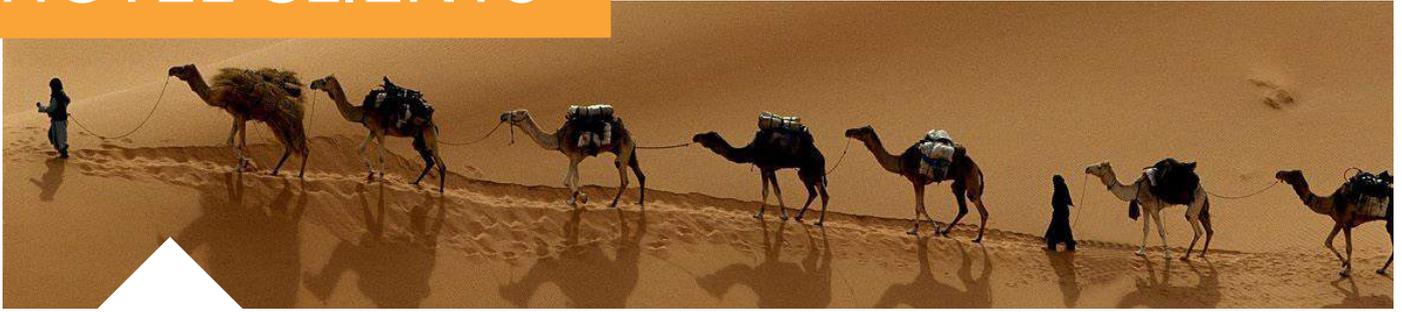

The foam core of Kudos Global's cushions are made from a water resistant and breathable polypropylene based material. The swelling seams prevent water from penetrating the foam core.
